MINING

The screenshot shows the XGP Mining State interface. At the top, it displays 'KT 8:43' and a battery level of '97%'. Below this is a navigation bar with a home icon, a lock icon, and a URL 'office.xgpinco.com/Or'. To the right of the URL are three dots. The main content area has a title 'XGP Mining State' and a circular progress bar labeled 'Mining Speed' with values ranging from 0 to 1560. The current value is 1200. Below the progress bar is a line graph showing mining volume over time. At the bottom of the screen are three navigation icons: three horizontal lines, a square, and a left arrow.

STAKING

The screenshot shows the XGP Staking interface. At the top, it displays 'KT 8:44' and a battery level of '97%'. Below this is a navigation bar with a home icon, a lock icon, and a URL 'office.xgpinco.com/Or'. To the right of the URL are three dots. The main content area has a title 'STAKING' and a section titled 'Holding XGP Amount'. It lists six purchase vouchers (P-1 to P-6) with their respective XGP amounts and 'Order' buttons. At the bottom of the screen are three navigation icons: three horizontal lines, a square, and a left arrow.

When converting to an application, each can be registered separately in the mobile market (App Store, Google Play, etc.)

01. Support for production in various designs

Produced by separately configuring UI/UX of PC web page for mobile environment

It supports Android and iOS application creation using Flutter, so it has excellent compatibility.

Increase user accessibility through mobile applications and support marketing use

(Marketing through YouTube, Google ADS, etc.)

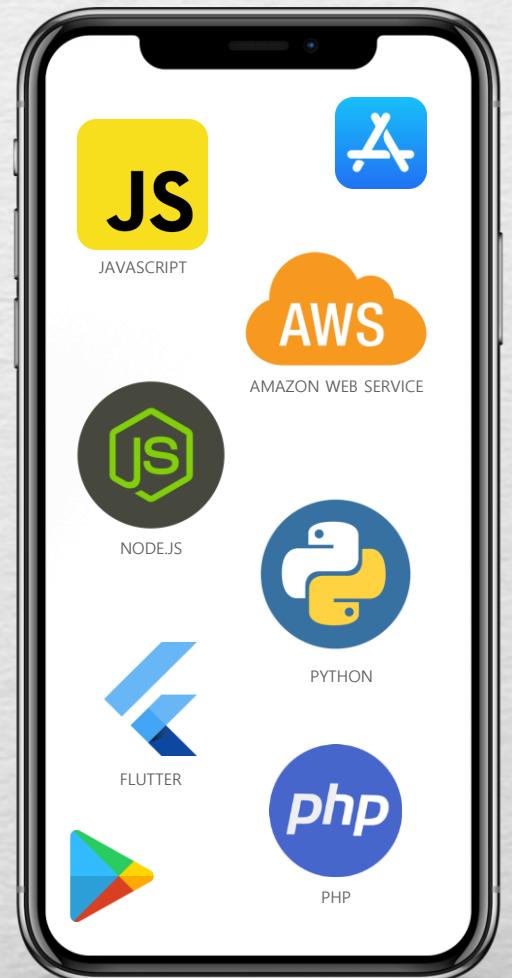

02. Securing expertise through composite technical support

Create admin pages for crawling and uploading articles, including creating search engines to support portal sites.

Product registration and automatic settlement manager page production for shopping mall site operation

Mobile live streaming technology and payment function support for online real-time broadcasting function

(Online real-time broadcasting available through smartphone)

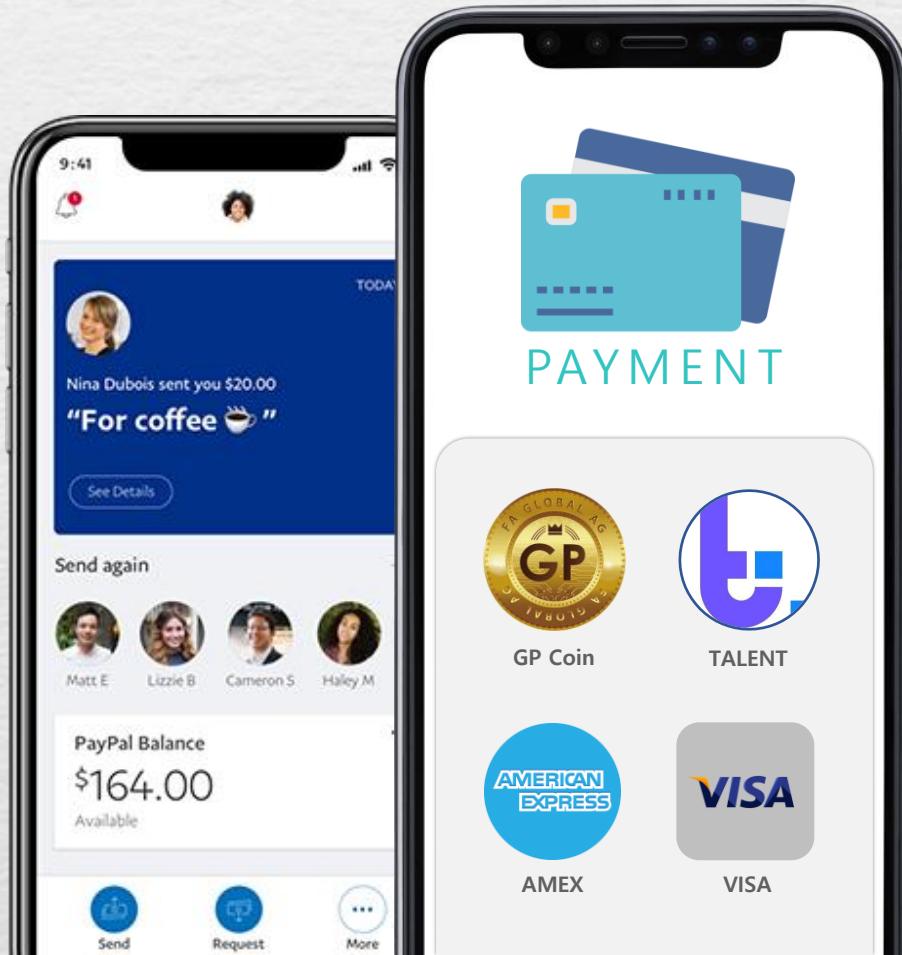

* crawling : Technology that automatically collects and stores specified information

SHOPPING PLATFORM

EASY PAYMENT
LINKAGE

Can be used in applications by linking APIs of self-made wallet services.
Other external easy payment payment APIs can be linked.

* Fees may be incurred when using an external simple payment payment

01. Self-Payment Management Wallet

It can be used by linking and charging with a wallet that collects existing payment APIs in one place.
Authenticating payments more easily using the simple authentication method.
(By combining location information with payment information, delivery can be processed at once.)

02. External easy payment linkage

Interlocking with the existing simple payment service so that users can use it easily
Once linked, it is linked to automatically use up to simple payment.
(As it is the same as the existing usage method, it is linked and developed with a user-centered configuration.)
